Addendum to the Design and Access Statement (page 1 of 1)

New House, Overstrand, Shopsdam Road, Lancing

During the detailed design stage of the permitted scheme for the new beach house at Overstrand, it became apparent that the functionality and architectural integrity of the house could be improved by a series of amendments.

The detailed nature of each amendment has been described on dwg. no. 1117-P-305 which has been submitted as supplementary information for the purposes of comparison between the permitted design and the proposed design.

These amendments do not change the design concepts, hence the same design and access statement has been re-submitted.

These amendments can also be seen when comparing revision A and revision B of the proposed drawing numbers 302, 303, 304.
