Application to Carry Out Tree Works – 10 Cherry Tree Close, High Salvington, BN13 3QJ

To Whom It May Concern,

I am writing to submit an application for tree works at the property located at 10 Cherry Tree Close, High Salvington, BN13 3QJ.

Along the northern and eastern boundaries of this property, there is a line of eight mature beech trees. Approximately three years ago, a similar group of trees on the adjacent property was professionally reduced to a maintainable size and shape.

We are now seeking permission to carry out the same type of work to the trees at number 10, to bring them in line aesthetically and practically with the adjacent trees.

Proposed Works:

- Reduce the height of all eight beech trees by approximately 3 metres.
- Reduce the lateral canopy spread by approximately 3 metres, where appropriate.

The aim is to create a uniform, manageable boundary line without causing any long-term harm to the trees. This approach has proven effective with the neighbouring trees, which have shown healthy regrowth and no signs of detriment following similar pruning.

Please advise if any further information or a site visit is required to support this application.
