Dear Keith Morgan

Planning application
SERVICE GANTRY THE LOOKOUT STATION SHOREHAM BY SEA BN43 5HY
I attach an application for a service gantry to the lookout station of the National Coast Watch at the old fort.

The gantry is required for maintenance of the windows and equipment on the roof. It is proposed the materials will match the existing first floor entrance and line through. It will also be used for easier identification of boats.

The structure of the existing stair and entrance are structural glass reinforced plastic and so reduce maintenance. The lookout station is only used in daylight hours and all the personnel are volunteers.

Yours sincerely

[redacted]

PETER WILSON
