DESCRIPTION	
SAFETY WORK SCHEDULE: Playground T1 LARGE HORSE CHESTNUT TREE *(Aesculus hippocastanum):* This mature and established tree is growing too large for its location within the school grounds. It is obscuring the view of CCTV cameras attached to nearby buildings and is reducing light so that the camera is unable to operate correctly. It needs to be reduced to a more manageable size more appropriate for its surroundings. ***The following arboriculture is recommended:*** • Complete a crown lift up to 4m from ground level to discourage children from playing on the branches. • Complete a 30% crown reduction. Reduce height from 22m to 18m and width/span from 19m to 14m. • Remove significant deadwood. • Leave woodchip on site behind the fence under the trees. • Leave cordwood and some logs in the wild space/forest school area.	

Additional Notes:

- *All work is undertaken by fully trained NPTC professionals. Public Liability & Employer's Liability insurance is provided up to £5 million.*
- *Our trained arborists will ensure that all cuts made are clean and to high arboricultural standards and complying with BS3998:2010.*
