PLANNING SERVICES

Dear Sirs,

Safety I am objecting to this column on grounds of safety * The is a danger of cancer risk
It would also be unsightly. ie a visual eyesore.
Indeed we already have enough health problems with the incessant 24/7 traffic 364 days per year!

* The science of radio masts in parallel has not vindicated erecting masts close to communities sic residential occupation.

** The Council still has not published a pollution report as promised. Why?

Yours Truly,

[redacted]

[redacted]

many neighbours have died of leukemia!
