Dear Sir,

Re: APPLICATION No WB/11/0231/TPO

We are the owners of the site north of the applicant's site and as such we have had endless problems in trying to get our trees removed or topped, which have TPO's on them.

As each time your Council's response is most unhelpful, we suffer great expense clearing up the continuous shedding of leaves, needles etc., The trees do not benefit us, but your Council's view is that 'others' benefit from them.

Clearly, if you grant consent for the above application, then your Council can expect a flood of applications and appeals for the removal of trees with TPO's on them within the road.

The above planning consent has been submitted previously, under 09/045/TPO, and for some reason withdrawn. A planning consent has recently been granted to develop a detached house and garages in Fairways rear garden. The consent has allowed the removal of several TPO trees. Perhaps you would like to comment why so many TPO trees are likely to disappear so quickly from this site. At best, I believe the trees in Group G5 should only be topped – especially if the removal leads to further access and development ventures.

Yours faithfully,

[redacted]

E.S. Taylor
