Dear Jason,

I believe their single storey extension build would need to be a minimum of 7ft 2 inches from our property.

We have worked out, from their eve and roof over hang, which protrudes 13 inches from the wall and is visible just above the 6ft fence. Between their eves and our conservatory the measurements are only 6ft 4 inches. It would be at least 10 inches under the permissable measurements and with our building, a metre before our conservatory, it would be even closer.

It will be too close and we ask that it not be allowed as the walls also would only be 6ft 8inches apart.

Kind regards
Andy and Sarah Tamsett
