Jo

In an ideal world I would prefer a full BS4142 assessment be carried out to ensure there is no increase in the overall background noise in the area. However as this is located in the middle of the site I believe, at least from the theory, that the noise level will not cause loss of amenity and therefore have no further comments.

Nadeem,

Please find attached the additional sound pressure information you requested.

Please let us know if you need anything further on this.

Regards,

Thanks Jo. I need to know the Sound Pressure Level at a given distance, either from each AHU or both combined, so that an initial assessment can be made.

Hi Nadeem,

I have received this information yesterday with regard to the proposed plant in connection with the above application – does this satisfy your concerns? The applicant would rather provide more information if you consider this necessary (to avoid having to impose a condition of planning permission). Let me know what you think……..

Thanks,
Jo

Hello Jo,

Please see attached details of the ventilation and air conditioning equipment to be used at the above for you to pass onto the EHO as discussed last week.
