Subject: Re: AWDM/0951/23 - 11 Warwick Road

Hi Jason,

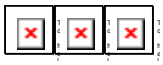

As the rear extension was constructed in 1988 it will hold little significance in terms of the special importance of this building. The works currently proposed. The current building defects appear to have occured due to substandard materials and workmanship. In the circumstances I support this proposal and the approach being taken.

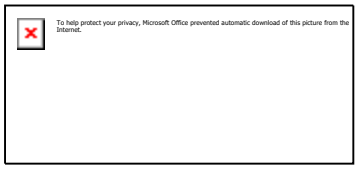

Kind regards
Richard

Unfortunately myself and Jo lack the expertise to make a decision on the application with regards to whether the proposed repairs would be materially harmful to the Listed Building. The deadline for the application is tomorrow but it's looking likely we will have to request an extension. Sorry to chase but could I please get something in writing from you?

I see on the property's history that this rear projection is not original and was constructed in 1988 as part of the conversion of the house into 3 flats. It was also evident at site visit that the leaking was bad and the tenant expressed how this has been happening and getting worse for some 7 years (since she's been at the property). Please advise on your views.

Hope all is well. The application in the subject field is for Listed Building Consent for the repair of the south elevation wall of the rear projection. I will be organising a site visit with the applicant after my leave next week. Please let me know if you would like to accompany me.

Thanks,
