Planning Assessment

Principle

There is no objection to the proposed removal of the timber windows and replacement with PVCu windows in a similar colour to the existing windows within the block of flats.

The relevant issues are the effects on the amenities of neighbouring residential occupiers and the effect on the character and appearance of the building and its surroundings.

Visual Amenity

The existing block of flats has fairly uniform windows within it with regard to the colour and design. The 2no. windows in question will be on the first floor to the rear and the side of the building.

The replacement windows will duplicate design and the colour of the existing windows within the block, but will change the material from timber to PVCu. This change is in accordance with many other flats within the block who have undertaken a change to PVCu

Residential Amenity

The change of materials will not affect the residential amenities of neighbouring residential properties.
