Dear Planning dept,

I'm writing to express my concerns about the increasing amount of tech installations going on in the town, specifically three new hubs, one in Goring, one in Broadwater and one in the town centre, Liverpool gardens. I attach a photo with the reference numbers and details of these installations.

I'd like to object to the increasing amount of electro magnetic frequency technology in the town. The seafront small cell towers too. The look of these things is again decreasing aesthetics, it's increasing the wireless radiation smog levels and it's encouraging the human addiction to these things. I work with children, the level of device and tech addiction is shocking and not being addressed because the adults/parents are similarly addicted to their devices. The people who live near these street hubs cannot get away from the radiation effects. These hubs are going to fuel the tech addiction further and the disconnection from nature and from other important aspects of life will be profound.

I realise that people who object are often seen as luddites, but look at the practical level. Why haven't the health aspects been researched more fully by the govt, and I know that they haven't. Is it the huge sums of money that are paid by these telecom companies to put in this tech? Our children cannot get away from this emf pollution and the damages of too much tech, they deserve better.

Please log my concerns and my objection to these installations, and the increase in 5G all over the town.

Kind regards,
Camilla Berry
