

To whom it may concern,

RE: AWDM/0639/26 -BT Street Hub proposed for Liverpool Road, Worthing and;
AWDM/0643/26-BT Street Hub proposed for Wallace Parade, Goring, West Sussex.

I wish to register a strong objection to both the above proposed applications, (and all street hubs of this nature,) on the grounds of risk to public health from electro-magnetic frequencies they will emit. Many people will be passing by these hubs and, as the effects are accumulative, the risk increases for local shoppers and residents. No risk assessment has been carried out on the group of people who have metal implants in their bodies-even dental work involving metal. I would like to be shown any health risk assessment carried out by the council before installation of any of these hubs.

Thank you,

Yours faithfully,

Deborah Long,
(previous resident and frequenter of both these sites and surrounds,) Now of; 105 Felpham Road,
Felpham, PO22 7PW.
