Wildlife Education Displays & School Packs

Help for education

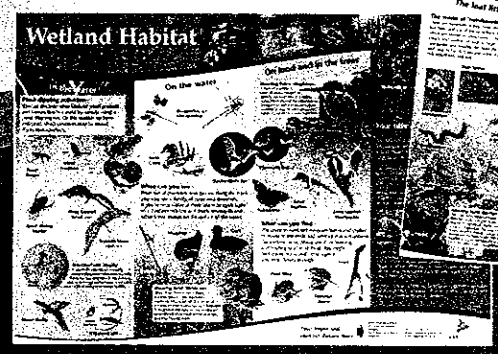

'Take a closer look at' nature

We have created a series of packs to cover different nature themes - these include mini beasts, birds, pond life etc. Each pack contains 6 different A2 display posters and A3 boards on the subject, with a CD containing PDF files for printing out in the classroom. A great learning package which can help children of all ages to become aware of the environment and wildlife around them.

'Take a closer look at' Insects pack

Habitat Boards

We have designed a number of template panels for different environments such as **Wetland** and **Woodland** areas, with a selection of the wildlife that inhabit these The artwork is designed to be bespoke to your area with spaces available for site maps and other information. The wildlife on each panel can also be changed to suit specific animals and plants in various landscape in the British Isles. The panels can be supplied as A1 and A2 posters - *please ask for details.*

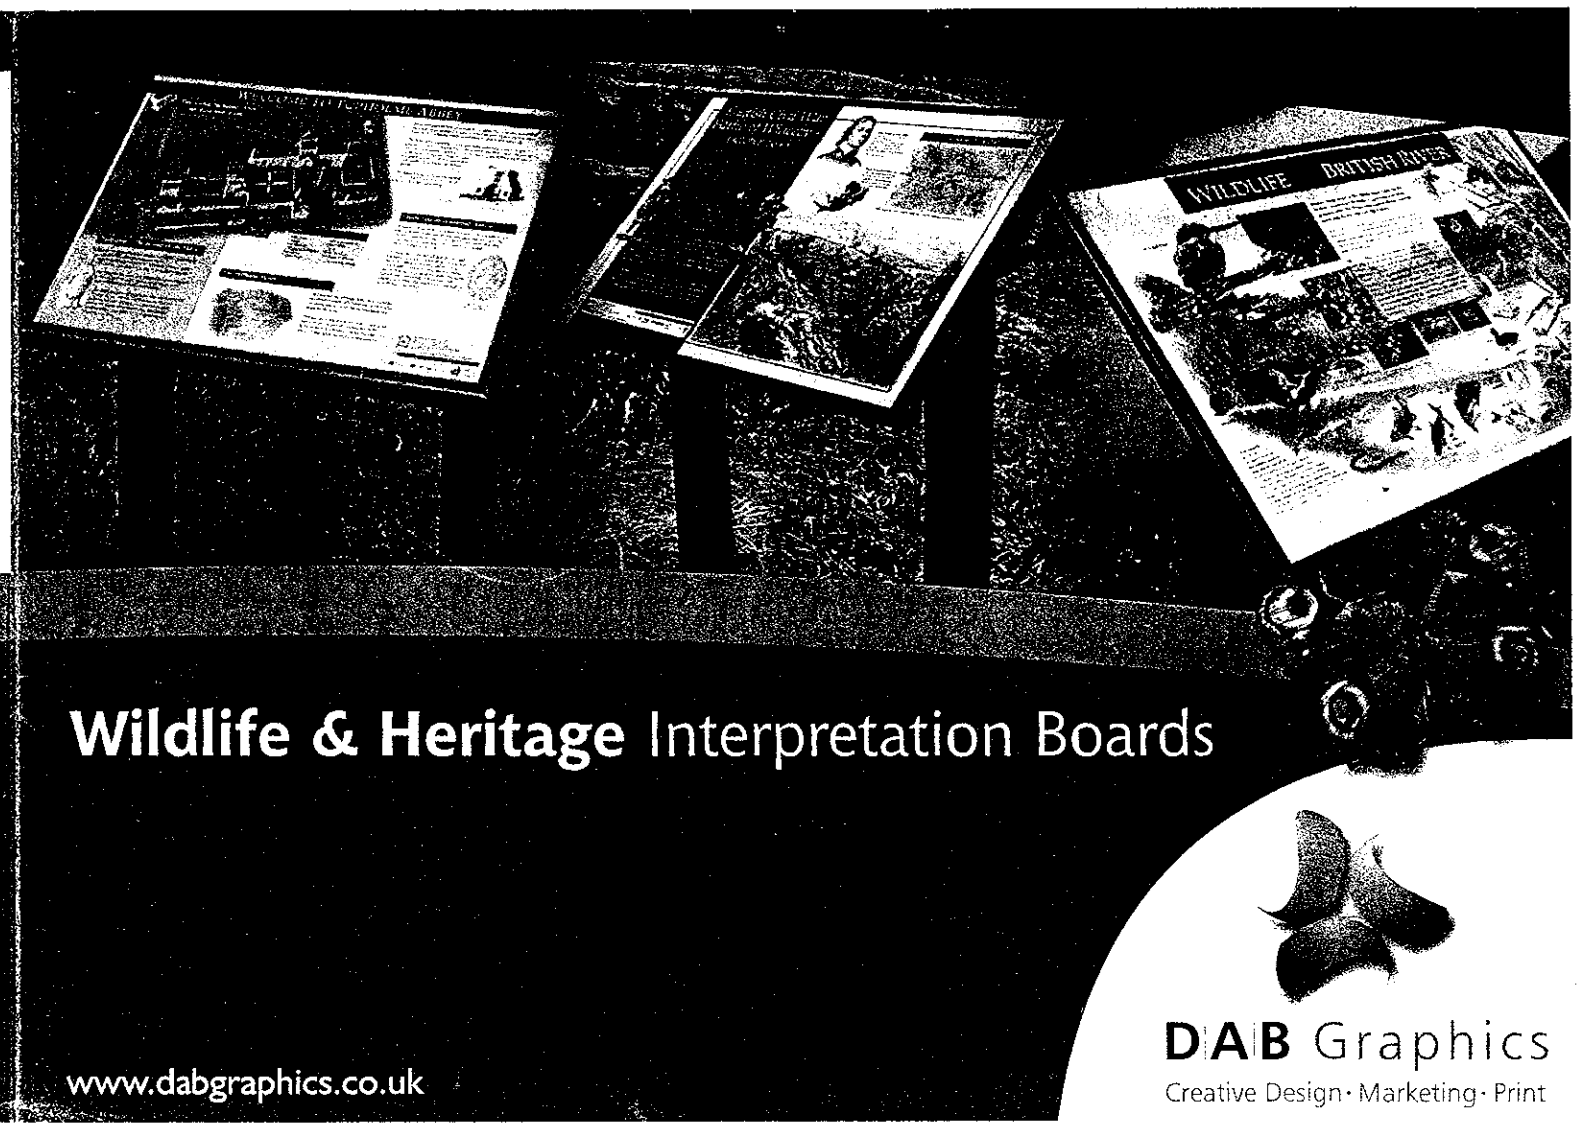

Wetland habitat

Woodland habitat

Habitat panels can be used in any of our display boards or supplied as laminated boards or wall mountable panels.

Steel & Timber
Interpretation Boards

Standard 2 legged lectern

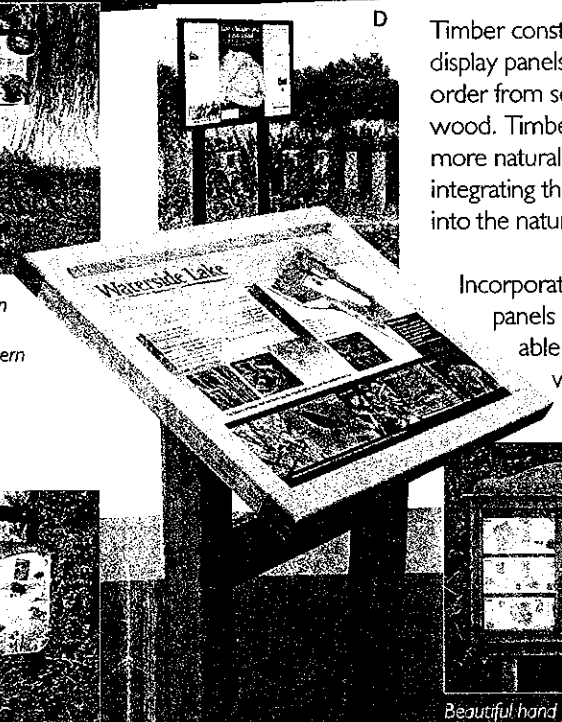

Our steel and timber style interpretation boards are built to the highest standards to ensure lasting durability in all conditions. The different heights and tilt of the display face makes them especially suited for wheelchair access and children.

All our steel work is powder-coated in gloss or satin finish using the RAL colour system. The lecterns come in a range of sizes to suit all requirements - from A0 down to A3.

A) Standard A1 lectern
B) A0 Duralite panel
C) Single pedestal lectern
D) Vertical display

Timber constructed lecterns and display panels are hand built to order from seasoned oak or soft wood. Timber built displays are a more natural and charming way of integrating the interpretation panel into the natural environment.

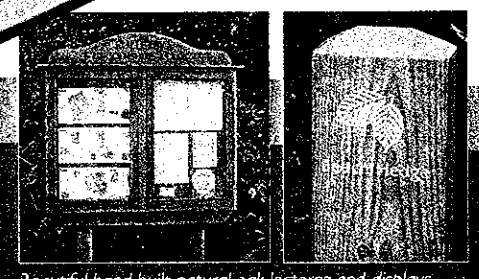

Incorporating Duralite GRP graphic panels as standard, the timber is able to be routed with text, wildlife and symbols.

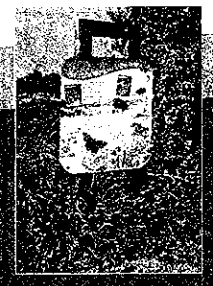

Design, Artwork & Illustration

Our graphics studio is able to create designs and artwork from your ideas. We can produce site maps, walk routes or aerial illustrations in various styles. A large natural history photo bank and in-house illustration service means our designs are both eye-catching and informative.

We are able to work from supplied artwork, please ask for our technical sheet.

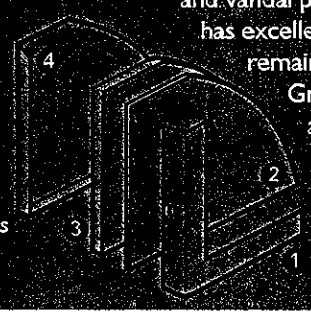

Beautiful hand built natural oak lecterns and displays

Aluminium panel mounted upon timber frame

Our display material of choice is Duralite (GRP) a glass reinforced plastic which is extremely weather resistant and vandal proof for up to 10 years plus. The material has excellent UV resistant qualities so the graphics remain bright and eyecatching for many years. Graffiti and other marks can be easily cleaned away using solvents. The diagram shows how the panel is housed in our steel or timber frames.
