Further to my response to the email below reference ADC/0320/10 i am responding now to the last application i recieved for the reduction in height by 15inches or thereabouts.
I am still concerned about the height of the "pitched roof shed" by cutting it down to this size it still would change the whole aspect of my garden and neighbouring gardens.
It still stands very close to the boundry between our gardens and changes the whole image from my bedroom windows and garden itself feeling like im being overlooked by the towering eyesore next door.
I do feel that a reduction of this size will still cause much upset to myself and neighbours in regards to our time in Adur Avenue.
I hope my comments help in this matter.

Kind Regards
Freya Dewing

Dear Mr Barnett,

RE: 69 Adur Avenue
Shoreham-by-sea

In reference to the proposed development of a pitched roof garden of 69 Adur Avenue, I am writing to pass on my comments.

Whilst i have no objections to my neighbours constructing a store shed in there garden i do have concerns about the height.
I feel a store house of such a height will change the aspect and atmosphere in my garden and aswell as the surrounding gardens.
I also feel it could affect the price of the property in the future.
I have no desire to create any unnecessary tensions between myself and my neighbours Mr and Mrs Brown but i do feel that this structure , at its present height would be an eyesore.
I would like to reiterate that i have no objections to the structure of a normal height being built in line with the other store houses in neighbouring gardens but feel this one could completely change my views from the back bedrooms and almost feel overwatched by a towering structure next door.

Kind Regards

F.Dewing
