I am replying on behalf of my mother Mrs Hacker of 26 Chester Avenue.

She is not against the development of the new sussex hotel, but has a few concerns.

With the size of the rear extension to the pub especially that it is going up to 3 levels. Feel it is a bit over development.

Also the garden function room in the north west corner is very close to her property she gets lots of noise now from the garden on good weather days. If the garden function room does get permission she would be keen for there to be restrictions with it's use for example not to used in the evenings, and noise levels to be monitored.

Also for it to be built with sound insulation board and lots of insulation to deaden the sound and for any speakers in the function room and garden to be pointed in opposite direction from the residential property's.

Also for the hedges that are already there to stay and be maintained in a healthy and sustainable way so they help block out noise and former a deep barrier to the boundary fence.

Thank you James Hacker
