Willow Tree Care - Tree Report

Date of Visit: 21.6.2023

Site Reference: 93 Upper Brighton Road, Broadwater BN14 9HZ

Dan Shorter visited the site on 23rd June 2023 to assess two trees on the property which are under protection orders.

T1 Beech tree is positioned in the front garden of the property. It is heavily decayed inside and requires removal. This tree poses a falling risk and is thus a threat to the property next door and to life. Replacement is not advised as the tree is positioned in close proximity to both the property and to the neighbouring property.

T2 Copper Beech is in the rear garden of the property. This tree is encroaching and overhanging the property next door and we propose selectively thinning and reducing by 1.5 metres whilst retaining integral shape.
