Stance: Customer objects to the Planning Application

Reasons for comment: - Privacy Light and Noise

Comments: Given the third and most recent change to this application, I object in the strongest possible way. Partial obscuring does nothing to restore our privacy. If one is sat below the obscuring, full view is still permitted. If one were to stand, full view is still permitted above the obscuring. I urge the planning department to follow through with the enforcement action previously initiated and put an end to this harassment. I am left wondering if the planning department has forgotten why enforcement action was required. We remain overlooked and our privacy is compromised for over 17 months now in complete disregard to previous planning decisions.
