Planning,

I have no objectives to this proposal as long as I can't see it from my home that directly backs onto the Co-op. However they have recently install an LED stripe light high up at the back of their building. This light directly shines on to my property 24hrs a day and at night it is causing light pollution into my home and garden. I was not given notice of this light being installed nor did I receive a notice from you. As this is what I object to can you please acknowledge receipt of this email and look into this matter

Thank you
Nicki Woods
