PLANNING SERVICES

Dear Sir,

Ref: Formation of pedestrian entrance and steps to rear garden of 27 Norbury Drive and new pedestrian entrance gate to north side of electric gates.

I wish to object to the application with regard to the above.

Number 27 Norbury Drive has a perfectly adequate runway to the North of the property providing parking space for 4 cars, a front access door, leading on to the back door and rear garden. What purpose would another entrance provide?

The application to build 2 new houses on land at the rear of Heyshott Close idicated that the access road would be for the use of occupants of these houses only.

Electric gates were for their sole use and not for any adjacent properties.

Finally how many people would be given access via the electric gates to access 27 Norbury Drive?

Security is of great concern as once inside the gates it would be entirely possible to gain entry to any number of rear gardens in this vicinity.

Yours faithfully,

[redacted] (MRS)
