Commenter Type:	Member of the Public
Stance:	Customer objects to the Planning Application
Reasons for comment:	- Design - Loss of General Amenity - Overdevelopment - Privacy Light and Noise - Trees and Landscaping
Comments:	I wish to object to these proposed changes for a number of reasons. My principal concern is the significant loss of natural light to the shared living room in Richmond Suite, where my mother resides. This communal room is a bright, welcoming space where residents spend a large part of their day. The reduction in natural light would, in my view, have a detrimental impact on the wellbeing and quality of life of all the residents who use this room, many of whom rely on a calm, familiar, and pleasant environment. I am also concerned about the loss of outdoor space available to the residents. This area is used regularly, particularly during the warmer months, and provides valuable opportunities for fresh air, exercise, relaxation, and social interaction. Reducing this space would diminish an important aspect of the residents' daily lives.

Finally, I am extremely concerned about the disruption that the proposed works would cause. Richmond Suite is home to residents living with dementia, including my mother. Construction noise, increased activity, and changes to their familiar surroundings are likely to cause significant confusion and distress, with a detrimental effect on their wellbeing. I am also concerned about the additional pressures this disruption would place on the staff who provide care and support to these particularly vulnerable residents.

Given the adverse impact that these proposals are likely to have on the residents' living environment, wellbeing, and quality of life, I respectfully ask that these concerns are given full and careful consideration when determining this application.
