Notes

1 You must have our consent for any work on a tree protected by a Tree Preservation Order. This includes cutting a tree down, digging up roots, cutting or trimming branches, cutting the trunk, and reducing the height of a tree.

2 A Tree Preservation Order can cover trees individually or groups of trees, areas of trees, or woodlands. If the tree is covered individually, please give the reference number of the Tree Preservation Order (for example, T1). If the tree is included in a group, area or woodland, please provide a sketch map identifying the exact location and species of the trees.

3 Please give details of the work you want to carry out on each tree and your reasons. If you want to cut off branches (lopping), please tell us which branches are to be removed. Or, if you are cutting off many branches, include the size of the crown. You can describe the work either as 'crown reduction' (to reduce the height or spread) or 'crown lifting' if you are cutting off lower branches. In either case you must give exact details of the work.

4 If you want to cut down a tree, we will normally ask you to replace it with another tree of a suitable species. Please tell us the species and location of the replacement tree you will plant if we give consent, or give the reasons why you do not want to plant a replacement.

5 We recommend you to support your application with full details of any specialist advice you have received from an arboriculturist or contractor. This is particularly important if you want to cut down a tree.

Please send four completed copies of this form together with four copies of plans showing the site of the work to be carried out to:

Assistant Director (Planning Services)
