Vertical Wall Mounted Cycle Hangers

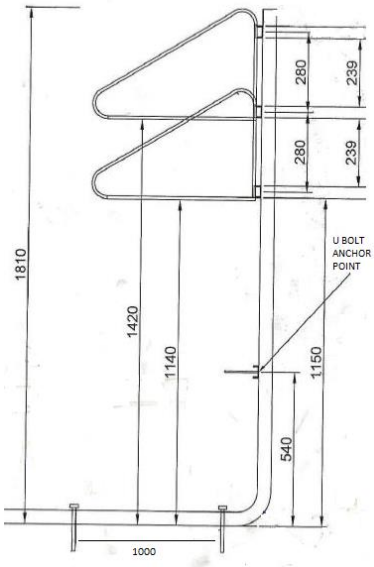

These hangers can be used for any number of bikes and provide an ideal solution for storing bikes in a confined storage area. Supplied with rails to allow the bikes to be vertically staggered to avoid handles bars and pedals clashing. Simple to install and cost effective. Can wall mounted or freestanding.

Secure by Design Homes 2016 Version 1
53.4 Research by the 'Design against Crime Centre' suggests that cyclists should be encouraged to lock both wheels and the crossbar to a stand rather than just the crossbar and therefore a design of cycle stand that enables this method of locking to be used is recommended.

Secondary locking bar is supplied to all racks.

All supplied height at 1810mm (allow 2100 w/bike) Can wall mounted or freestanding. Overall depth when wall mounted approx. 650mm, or freestanding allow depth 1500mm for legs.
