PLANNING SERVICES

Dear Sir

I have recieved a letter from you, regarding a structure having been built (obviously without planning permision) on the site belonging to the Brittania Inn which is situated behing my property and that of my neighbour Mr Mark Caplin at member five.

There is a constant humming from this building and it is also ugly. I can myself hear the noise although luckily I have a garden shed and a tree between myself and it.

Mark, however, has nothing between his property and the new building. He sleeps at the rear of his home and the constant humming or buzzing is bothering him a lot and is affecting his sleep. It is a bit like a ticking clock at night, which sounds like Big Ben.

I think that if you are going to approve this structure, you should insist that some sort of barrier should be erected to protect us from noise pollution. I think that a strong fence of a decent height should most definitely be between our properties and this structure.

yours sincerely
