Hi, marie.

[redacted]

I am writing to you in regards to 68 first avenue lancing.

My question is why cant the dormer be built on the west side of the house ?

In my opinion it would be better, as it would not invade my privacy by overlooking into

My house.

Also it would look horrible at the front of the house.

My next door neighbour has his at the back looking into his garden and that's ok.

All I am saying is have it on the back of the house please. My number is [redacted]

Thanks

Tony
