Dear Sir/Madam,
I strongly object to the above proposed mast.It would be detrimental to the environment/wildlife/insects as well as being an eyesore.Also It should be treated as a Prior Approval application should be fully adjudicated as any other planning application under GPDO of the Town and Country Planning Act 1990. According to 'Changes to permitted development rights for electronic communications infrastructure: technical consultation' of 7 March 2022, paragraph 10, new ground based masts: All new masts still require the Prior Approval of the Local Planning Authority, and consideration of community representation. https://www.gov.uk/.../changes-to-permitted-development...

- Telecommunications base stations (phone masts) are intrusive and overbearing and they degrade the aesthetics in both urban and rural areas. A mast would not be in keeping with the buildings and skyline in this vicinity. This is a proposal for an ugly, stark, alien, industrialising, feature that would greatly impact the local visual amenity. It is likely to cause visual disturbance to road users.
- -I was blocked from commenting on the council website with a "403 forbidden" page popping up when i tried to submit comments.Maybe this problem could be rectified?
- Regards,
- Sylvie Kinnear
