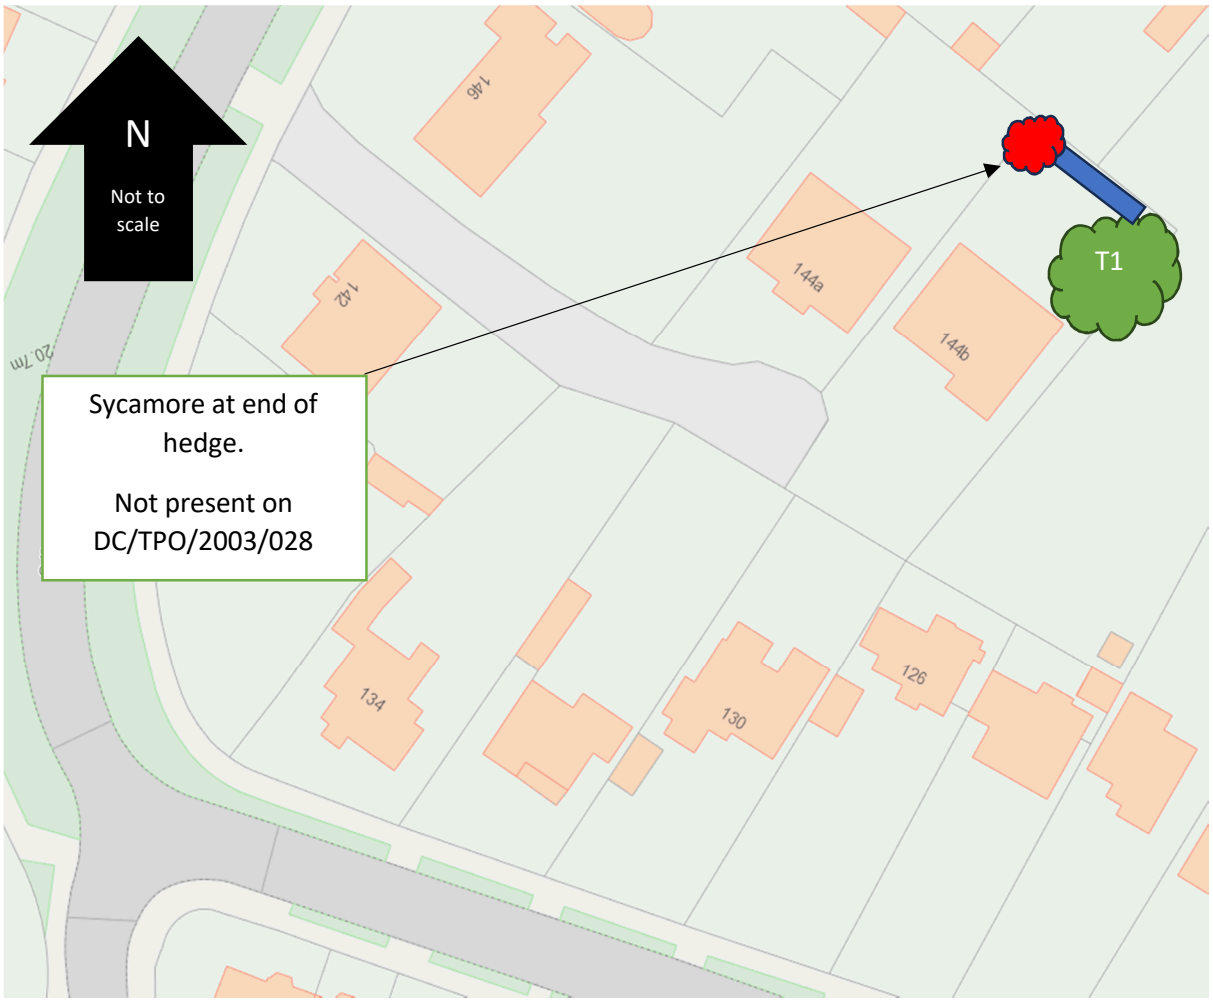
144b Offington Drive WORTHING West Sussex BN14 9PU



T1 Oak, reduce crown and reshape accordingly by approx. 2.5 - 3m to leave crown at similar size to last pruning.

The tree has a long history of pruning maintenance to keep it at a suitable size for its location. The works for which the application is being made, will continue this maintenance program, thereby ensuring retention of nuisance free heathy tree for many years in the future.

Sycamore at end of hedge, has been repeatedly cut into line with hedge, but has recently been allowed to grow uncontrolled. The proposed works will restart the erstwhile maintenance program of hedge maintenance and growth control. It is unlikely the tree is more than 20 years old, therefore not present on the TPO of 2001
