Subject: Goring gap

To: <planning@adur-worthing.gov.uk>

Dear Sir/Madam, in response to the application at goring gap, there are many issues that need to be addressed. At the moment people are living and sleeping in the van and horse box's on this land as solar panels are on top of their roofs.

The main points as I see them is the safety of children, who parents might leave them there to play in the sand pit, and make their way back to the green, and the children wanting to go back to their parents will have to cross a busy coastal road who going to supervise and implement this!

The health and safety of the sand pit area, with foxes and other using it as their toilet, how will it be cleaned!

Hard standing area's to be laid for the wind surfers vehicle!, or otherwise when it rains they will stuck in mud and when finally pulled out there will be mud and debris on the road

Under the highway act 1986. Section 148 makes it an offence to deposit anything on the highway that results in endangering road user.

See also section 161

See also section 149

See road traffic act 1988.

So what provisions are provided should this happen!.

Will the owner be providing and supplying utilities for electricity, water and sewage to this site, if so they would have to be connected, to the mains but where are they!

There are many more things that come to mind, I feel this person does what he wants without planning permission, wind surfers have always camped to the east of Sea Lane cafe, this person is just there to make money for himself and has not looked into the practicality of things
