Application for the Replacement of Crittall Windows to uPVC Double Glazed Windows @ Gresham House, 54 High Street, SHOREHAM, West Sussex, BN43 5DB

This application is for the removal of Crittall windows at the above address, the installation will take approximately 3 days. No debris, metal, glass, etc will be left overnight, no aperture will be left overnight as a security risk.

The building will have a scaffold surrounding the work area with the necessary netting and kick boards for the protection of the public and anybody walking or working below.

uPVC Double Glazing will be put in place of the Crittal windows and no design changes will be made, however slight sightline changes will occur because of the change in product.

The reason for this application is that the existing windows are now very draughty and old and offer no thermal qualities to the occupants throughout the Winter months of the year.

This is their second application/enquiry to us regarding the above windows, they are eager to make the improvements to the property.
