Proposal, Site and Surroundings

The application refers to a large mature Ash located adjacent to the garage building, and southern wall in the front garden of the property. The tree is a prominent part of the street scene and makes a contribution to the character and visual amenities of the West Tarring Conservation Area.

Consent is sought to reduce crown height and radial spread.

The reasons for the works are primarily in the interests of light issues and amenity value.

Consultations: Letter sent to The Worthing Society, who did not respond.

Representations: None received.

Planning Assessment

The tree is a large mature Ash growing in the front grounds adjacent to the detached single garage and the boundary wall with Bishops Court Bishops Close, which is outside of the West Tarring Conservation Area. The tree is prominent to the area and can be seen from many views.

The tree has a single stem to 8 metres, becoming greatly reduced in diameter from 4.25 metres, with several long side stems that emerge from 1 metre on the west and 2 metres on the eastern side, that extend to the top of the crown. The tree has been previously reduced, and the crown is dense with long tall poles. The main crown is dense and widespread with some slightly over extended laterals.

The proposed works are to reduce crown height and radial spread by up to 2.5 metres. The works are to contain the size and spread of the tree.

These works in my opinion would be relatively minor in relation to the overall size, spread and crown form of the tree and would not significantly or adversely affect its appearance, amenity value, or its contribution to the character of the West Tarring Conservation Area.
