Dear Mr Appelton

Planning Application ADC/0116/11

Holmbush Centre Upper Shoreham Road

I am writing to object to the above planning application. During the construction work at the premises in question, it has become clear that significant noise travels from the rear of the premises to our property. The reversing alarms of lorries are audible and we can even clearly hear the conversation of the construction workers in the proposed delivery area. This has already caused us significant nuisance particularly at the weekend. I am very concerned that delivery lorries reversing alarms, the general clatter of unloading and movement of fork lift trucks will cause unacceptable noise to the rear of my property.

Having two young children under the age of four, it is essential for their development they can enjoy a quiet night's sleep and the family can enjoy quiet time together at the weekend.

I therefore consider any delivers before 8 am or after 6pm on week days and any weekend delivers unacceptable and a breach of my rights to a quiet family life. I believe allowing deliverers during my proposed times will give the applicant more than adequate flexibility to schedule deliveries of goods to the new store. If this matter was critical to the business in question, they should have made this request in the original planning application and to raise the matter at this stage, frankly reflects poor planning on their part and compromises the planning office and residence opportunity to assess the impact of the proposed development in its entirety.

I look forward to hearing your response to my objection shortly.

Yours sincerely,

[redacted]

Dr Robert Morgan
