Dear Mr Appleton.

Ref ADC/0122/11

Reduction of trees outside Nos 7 & 9 Lesser Foxholes, Shoreham

I thank you for your letter dated 6th April relating to an application that has been made by 'The Lesser Foxholes Management Commitee' for the reduction of trees as mentioned above.

I bought the house over thirty years ago, since when the growth in height and breadth of some trees has been enormous and has really reduced my garden by a third due to the lack of light. I refer in particular to one evergreen tree which is almost twice the height of my house, but half of it's branches are now overhanging

my garden.

The reduction of light due to the trees make it impossible to read in my lounge during the Winter which means that the lights are a must most afternoons.

If any person from Adur Planning Dept. wishes to see the problem from inside of my home they are very welcome.

I hope that you will uphold the application applied for

Yours sincerely
