APPLICATION NO./ADDRESS

WB/10/1111/FULL

The Three Fishes
56 Chapel Road
Worthing

DESCRIPTION OF DEVELOPMENT

Variation of condition 1 of planning permission WB/09/0967/FULL for the continued use of part of the public highway for the siting of tables and chairs with no more than 3 tables and 3 chairs per table.

This is a renewal of a temporary one year planning permission granted initially in December 2007 (WB/07/1345/FULL) renewed in January 2010 under WB/08/1129/FULL and again in January 2010 under WB/09/0967/FULL.

The approved scheme under WB/09/0967/FULL and previous planning permissions entails the provision of three tables of three chairs to minimise visual impact and to safeguard pedestrian access along Chapel Road. It annexes two separate areas in front of the Chapel Road frontage between the two sets of outer doors and the central doors. The areas are 1.4 metres deep and 3.2 metres and 1.6 wide, respectively. Metallic style tables and chairs and metallic barriers were placed on the pavement in accordance with the planning permission in groups of two either side of the entrance but connecting ropes to delineate the areas also added. No planters, or patio heaters are proposed or have been stationed here but an A Board and bicycle were present for most of the original trial period subsequently removed but then reinstated. Currently there are no chairs or table stationed at the site, only an A Board.

Other conditions imposed on previous planning permissions are equipment to be removed by 5pm and stored inside the premises; no planters. Patio heaters or other chattels or equipment stationed on the forecourt area except by agreement with the Local Planning Authority.

DATE OF SITE VISIT: 14.3.11

NEIGHBOURS CHECKED : Y / ~~N~~

ADDITIONAL NEIGHBOUR NOTIFICATIONS (LIST ADDRESSES):

SITE AND SURROUNDINGS:

The property which is the subject of this application is a public house established in 2000 and located in the northern part of the town centre. It is surrounded by commercial uses, save the flats in Ambrose Place and Street Pauls Church opposite. The pavement here is 4.5 metres deep and opposite a pedestrian island. Parking is strictly controlled in Chapel Road which falls in a Controlled Parking Zone. The nearest public house is Sir Timothy Shelley to the south which has planning permission for very limited seating for patrons due to narrowness of the pavement The existing building is a 3 storey art deco former gas show room and falls within a Conservation Area and close to the listed St Pauls Church. It also falls within designated Secondary Area of the Central Shopping Area in the Saved Worthing Local Plan.

REPRESENTATIONS AND RELEVANT CONSULTATION RESPONSES :

Highway Authority;

This application has been dealt with in accordance with the Development Control Scheme protocol for small scale proposals which include up to 5 residential units or extensions to single units accessed from roads that do not form part of the Strategic Road Network (SRN). As such the comments provided by Local Development should be considered to be advice only, with respect to this planning application.

This proposal has been considered by means of a desktop study, using the information and plans submitted with this application, in conjunction with other available WSCC map information. A site visit can be arranged on request.

I refer to your consultation in respect of the above planning application and would provide the following comments.

West Sussex County Council was consulted previously on Highway Matters for this location under planning application no. WB/967/10 to which no objections were raised

The current use has been in existence for sometime. Since the previous application in 2009 I am not aware of any adverse comments that may have been made by the Highway Authority, or of any other highway related concerns with this site and the current use. Therefore, I would not foresee there being any significant highway issues to this use continuing.

West Sussex County Council tables and chairs licensing: Previously reported that current license for 3 tables of three chairs issued with conditions.

Draft guidance on maximum extent of chairs and tables on highway in Chapel Road issued for consultation with Worthing Borough Council in 2009, showing maximum depth of 1.6 metres from the front of the premises along the width of the premises

Environmental Health Manager : No objections but renewal process allows for situation to be monitored.

Sussex Police: No objections

Conservation Area Advisory Group: No objections

HUMAN RIGHTS:

Article 8 (Right to Respect of a Private and Family Life) and Article 1 of the First Protocol (Protection of Property) of the Human Rights Act 1998 are relevant to this application. It is accepted that the proposal, if approved, would have some impact on the neighbouring properties. However, it is considered that the level of development proposed would not cause undue harm in terms of additional noise, disturbance and loss of privacy and that, on balance, existing residential quality of life would not be adversely affected as a result of the proposal. Accordingly it is considered that it is acceptable with regard to Article 8 and Article 1.

PLANNING ASSESSMENT: (Include any impact on Crime & Disorder and Issues identified above)

Temporary planning permissions have been granted on three occasions to monitor the impact of the scheme in practice on the town centre and recently also to assess how the scheme relates to recent pedestrian improvements to Chapel Road. The new draft guidance issued by the Highway Authority for consultation is also relevant. As such, the principal issues raised by this proposal are:-

- Acceptability of principle and impact on vitality and viability of the town centre
- Impact on the amenity of neighbours
- Impact on the appearance of the property and character of the Conservation Area and setting of listed building
- Impact on access
- Impact on crime and disorder

Acceptability of principle and impact on vitality and viability of the town centre

The parent premises are an established feature of this part of the town centre and A3 uses (predating recent revisions to Use Classes Order) permit A3 uses in this Secondary area. There are no such forecourt uses closeby apart from Sir Timothy Shelley to the south on the west side of the road and the proposals appeared initially slightly anomalous. However, the contrast is not unacceptable as the proposal adds to street life, vitality and colour and meets a need for a patrons' smoking area and has become and established part of the street scene over the years. The pedestrian improvements to Chapel Road have been implemented and enhance pedestrian safety and encourage pedestrian activity in this vicinity. They generally increase pavement area and rationalise parking/loading space. The seating area does not conflict with this and is, accordingly, compatible.

Impact on the amenity of neighbours and crime and disorder

This is a commercial area but a condition to restrict the use to 5pm has been in operation for 3 years now and works successfully. The Executive Head of Health and Community Safety reports no complaints or problems and likewise the Police. Given this and the small area used together with the ambient noise and activity levels and separation distance to nearest residential dwellings, no unacceptable impact results.

Impact on the appearance of the property and character of the Conservation Area and setting of listed building

The 3 tables of 3 seats and allied apparatus, neatly set back has not been visually obtrusive and the apparatus design is good quality. As such it is modest in scale and not out of keeping with the commercial function of the town centre and parent premises. No significant harm to the Conservation Area or the setting of the listed St Pauls Church would result. Further clutter remains controlled by condition. This includes the A board.

Impact on access

The 3 tables of 3 seats and allied apparatus are clear of the main pedestrian desire line and have not impacted on safety or convenience).

The modified scheme accords with the License issued by the Highway Authority and the draft guidelines prepared by the same. That said, this guidance is still evolving and for this reason it is appropriate that the planning permission is once again made temporary in order to ensure the scheme relates to the finalized guidance. However, a relaxation to 3 years is justified in the current circumstances. The A Board is restricted by condition to be sited within the envelope of the tables and chairs to address the Highway Authority concerns.

RECOMMENDATION:

Grant Permission subject to 3 year temporary; approved drawings; restricted to 3 tables of 3 chairs; .equipment to be removed by 5pm and stored inside the premises; no planters. Patio heaters or other chattels or equipment stationed on the forecourt area except by agreement with the Local Planning Authority; A Board restricted to the envelope formed by the tables and chairs and no further from any part of the front of the premises than one metre and not on any part of the highway which is not directly in front of the premises.

REASONS FOR RECOMMENDATION:

The proposal is acceptable in principle in the town centre and the limited number of covers would not harm the visual appearance of the area, would not restrict unduly pedestrian movement; would not give rise to unacceptable neighbour amenity impacts or crime and disorder and accords with the relevant policies of the Development Plan. However, a temporary planning permission is appropriate to ensure any permanent scheme is compatible with guidance under preparation by Worthing Borough Council and the Highway Authority for alfresco eating and drinking in the town centre, albeit of a longer period.
