Gary Peck.
Planning, regeneration and
Well Being,
Adur Civic Centre,

Dear MR Peck, I am writing to object to the proposed construction of a single storey extension to the rear of 14. Croft Ave. I base my objections on the following:

1. Loss of light and solar heat. There will be some loss of light and warmth and this will affect my glassed in porch and sitting room and it is an important factor as I use the former area to grow plants for house and garden use. Any loss of light and warmth naturally effects their healthy growth. This is especially relevant in late winter and early spring, when most frequently morning is the best and sunniest part of the day. It is also a time when I would be experiencing shade from the extension.

As an 85 year old widow with limited mobility due to painful arthritis it is important for my health and well being that I maintain my lifetime interest in gardening in a place nearest my living area.

2. Inconvenience - The noise and dust of ensuing building work is one I would find hard to endure - particularly as I fail to see how this work could be done without encroaching on my land - for which permission has not been sought or given. There would also be ensuing drainage problems which have not been resolved.

Yours Faithfully,

[redacted]
