Development Management - Delegated Officer Report

Application Number: AWDM/1262/21 Recommendation – APPROVE

Site: 30 Manor Road, Lancing, West Sussex

Proposal: Single storey rear extension

Date of site visit: 10th August 2021

Neighbours checked: Y

Additional neighbour notifications: N

Proposal, Site and Surroundings

The application site is an attractive two storey cottage style property with a thatched roof. It is semi detached and fronts Manor Road facing south located within north Lancing within the Conservation Area. The attached dwelling 3 Fircroft Avenue is on the corner with Manor Road and Fircroft Avenue. The dwelling house has a front garden and driveway.

The current application seeks consent for a single storey in fill extension between an existing single storey projection and the boundary with the attached dwelling. It is to the rear of the dwelling on the north side. It is proposed at 3.2 metres in depth with a lean to roof with overhang, a conservation roof light with bifolding doors. The roof of the extension will continue to adjoin the single storey projection providing a glazed roof link. The plans also show an existing single storey addition to be rebuilt with new external walls. Materials are as detailed on the plans, brick work with painted render to match existing, roof tiles to match existing, conservation style roof light in grey and clear glazed covered area.

It should be noted that an application has also been submitted for a single storey extension at the attached dwelling no. 3 Fircroft Avenue (AWDM/1260/21) and the applicants intend to carry out the build as a single development. The plans show a party wall between the two extensions continuing beyond the rear of the extension adjoining the original boundary wall.

WSCC Guidance on Parking at New Developments (Sept 2020).

Planning Assessment

Principle

The proposal comprises upgrading the existing housing stock located within the built up area and can be supported in principle. The relevant issues are the effects on the amenities of neighbouring residential occupiers and the effect on the character and appearance of the dwelling and its surroundings including the impact upon the character and appearance of the Conservation Area.

Visual amenity and Impact upon Conservation Area

The proposed extension is to the rear of the property it is modest in scale and is sited within a recessed area. It will not be visible within the street scene or impact upon the surrounding Conservation Area. The extension will be subservient to the main dwelling and does not detract from its historic character and appearance. The materials to be used are in keeping and sympathetic.

Residential amenity

The main property to be affected is no. 3 Fircroft Avenue the attached dwelling. There is a high level boundary wall between the properties as existing. As stated above the proposal has been designed in conjunction with the proposed single storey extension at the neighbouring property, the plans show a joint party wall. If the full development at both properties is carried out then the extensions will be alongside each other of almost matching depth (with the additional overhang in this case) therefore there will be no loss of light or overbearing impact to either occupiers. The planning applications are separate and therefore there is the possibility that one consent could be implemented without the other due to various circumstances beyond planning control. If this did take place it is not considered that this proposal would give rise to a detrimental impact that would warrant a refusal in this case. The neighbouring, adjacent window is in a recess facing north however there is also a large front, south facing window serving this room. There is also already a high wall running along the boundary. Therefore any loss of light as a result of the extension would not be significant in this case. The extension in this case be supported.

Recommendation

APPROVE

Subject to Conditions:-

1. Approved Plans

2. Standard 3 year time limit
3. Materials as detailed on approved plans to include brick work with painted render to match existing, roof tiles to match existing, conservation style roof light in grey and clear glazed covered area.

Is recommendation contrary to letter(s) of representation? N

The Local Planning Authority has acted positively and proactively in determining this application by assessing the proposal against all material considerations, including planning policies and any representations that may have been received and subsequently determining to grant planning permission in accordance with the presumption in favour of sustainable development, as set out within the National Planning Policy Framework.
