Dear Sirs,

Pump House CEGB Basin Road South Southwick West Sussex

Thank you for consulting Hove Civic Society on the proposal for two 100kw wind turbines on the southern spur of land forming the eastern arm and breakwater of Shoreham Harbour.

It appears to us that this proposal is in line with the renewable energy aspirations of the JAAP and we very much welcome additional wind turbines to support those aspirations. We believe this would set a useful precedent for further similar installations.

Having commented on and supported key elements of the JAAP the Society therefore firmly supports the proposal.

Yours sincerely

[redacted]

Helmut Lusser

Chairman

Hove Civic Society encourages high standards of architecture and town planning and the conservation of buildings of historic interest throughout Hove.
