- ☐ Yes, on the development site
☐ Yes, on land adjacent to or near the proposed development

Supporting information requirements

Where a development proposal is likely to affect features of biodiversity or geological conservation interest, you will need to submit, with the application, sufficient information and assessments to allow the local planning authority to determine the proposal.

Failure to submit all information required will result in your application being deemed invalid. It will not be considered valid until all information required by the local planning authority has been submitted.

Your local planning authority will be able to advise on the content of any assessments that may be required.

Biodiversity net gain

Biodiversity net gain is a legal requirement for planning permission introduced on 12 February 2024. All applications are required to either provide detailed information proving there will be a biodiversity increase; or explain why the requirement does not apply to the development.

Do you believe that, if the development is granted permission, the general Biodiversity Gain Condition (as set out in [Paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990 \(as amended\)](#)) would apply?

- ☐ Yes
☒ No

Biodiversity net gain has been introduced as a general condition for planning permission. As set out in [The Environment Act 2021](#): "grants of planning permission in England [are] to be subject to a condition to secure that the biodiversity gain objective is met". Therefore, in England, all planning permissions are generally subject to biodiversity gain rules, unless they are specifically exempt or out of scope.

If you have stated that the biodiversity net gain requirement does not apply to your application you must provide the reason(s) why, and may also need to supply evidence (especially where you believe the application is eligible for the 'de minimis' exemption).

Please add all the reasons why biodiversity net gain does not apply and enter a justification for each one

Reason biodiversity net gain does not apply:

Development subject to the de minimis exemption (development below the threshold)

What best describes the size of your site?:

Over 25 square metres

Please justify the reason why biodiversity net gain does not apply:

The proposed development to extend a day-use children's nursery within a 532.75m² site, with a total works area of 63 m², of which approximately 15 m² comprises habitat and the remainder is concrete hard surface. The scheme is not householder, not a change of use, not temporary, and does not involve minerals or waste development, and it affects no statutory or irreplaceable habitats (no SSSI, SPA, SAC, Ramsar, Ancient Woodland, Local Wildlife Site, or Priority habitat). As the habitat impact is under 25 m², the project falls within the de minimis exemption for Biodiversity Net Gain in England, meaning mandatory BNG does not apply. No pre-application habitat creation or enhancement has occurred, and no baseline surveys or statutory metric have been run.

Note: Please read the help text for further information why developments may be exempt or not in scope.

Trade Effluent

Does the proposal involve the need to dispose of trade effluents or trade waste?

☒ Yes

☐ No

If Yes, please describe the nature, volume and means of disposal of trade effluents or waste

The day nursery generates limited trade waste as part of its daily operations. This waste consists primarily of food waste from the preparation and serving of meals, general packaging waste from supplies and deliveries, disposable nappies and hygiene products. The volume of waste is expected to be minimal, with some general waste each day alongside recyclable materials. All waste will be disposed of responsibly through the local council's commercial waste collection service or otherwise via licensed private waste disposal. Separate bins will be provided for recyclable materials in accordance with the local council recycling scheme. Nappies and other hygiene waste will be securely bagged and disposed of in compliance with health and safety regulations. The nursery will ensure that all waste disposal practices adhere to local authority guidelines and in accordance with environmental regulations.
