**Design & Access Statement for the Proposed ATM Installation E002384 @ Martins, 7-9 Strand Parade, The Boulevard, Goring by Sea, West Sussex, BN12 6DH**

Local Planning Policy (Circular 01/2006) was considered during the design of the installation

The initial purpose of the installation is to provide banking facilities to the area.

The ATM will have the principal benefit to the community of providing cash on demand, thus encouraging people to visit local shops, spend money in these shops and therefore maintain and enhance the vitality and viability of the area.

There are a number of mandatory standards which apply, relating to the position of the ATM, its visibility, ambient lighting, building structure, building security features, ATM anchoring, safe strength.

Car parking availability on the roads adjacent to the ATM location is also considered.

Site approval by the Cash In Transit company will be obtained. They will consider routes to & from the ATM, ensuring there is protection of their staff and of any staff and customers at the site. Paramount in their review will be the welfare of their staff and the persons they come into contact with.

The ATM is of a standard design as located in many locations throughout the UK. It will be unobtrusive, comprising metal and plastic materials, blending in with the modern shop fronts.

The cash in the ATM is protected from attack by being secured in an internal safe certified to UK standards [UL 291 Level 1]. That safe is locked with a one-time code lock widely accepted in the ATM industry. Additional locking measures are provided for some areas. Steel security enclosures providing an external skin for the ATM are key locked but the site has no key holding and is thus unable to access the ATM surrounds.

The ATM installation is designed to conform to the requirement laid down by the Disabled Discrimination Act.
