Application for Tree Works – Trees Subject to Tree Preservation Order (TPO)

I am writing to apply for permission to carry out tree works on a Holm Oak located in the rear garden of 21 Vickery Fields, Worthing, BN13 3SF. The tree is currently protected under a Tree Preservation Order (TPO) and is in good health.

As part of routine maintenance, we would like to carry out a lateral reduction of approximately 2 metres on the eastern side of the canopy. This work is intended to reduce overhang into the garden and return the growth to its previous pruning points.

The growth in question is superficial and the proposed reduction will not impact the tree's health or structural integrity. The works are intended solely for ongoing management and to maintain balance within the garden space.

We hope this request will be viewed favourably and are happy to provide further information or arrange a site visit if required.
