6th September 2010

Dear Sir/Madam,

Your ref ADC/0289/10
Proposed Development at 33 Hammy close, shoreham

further to your letter dated 11th August 2010, and my subsequent visit to your offices, I am now writing to express my concern over the above proposal.
I have viewed the plans with the planning officer and feel that a 10metre distance of continual, brickwork would certainly be an eyesore, as this is viewed not only whilst in the garden but on full view from the lounge, this is made more evident as my property has a bio-folding glazed 5 door which is full width, which opens the whole rear of the property, this is used greatly especially during the warmer weather.
A view of 10metres of brick would be unsightly and I would welcome a chance to have a planning officer visit, to point this out to him, or attend a meeting whereby I could produce photographic evidence to outline the view, which would be seen and the lost of sunlight to my garden.

I would welcome your comments

Yours faithfully
