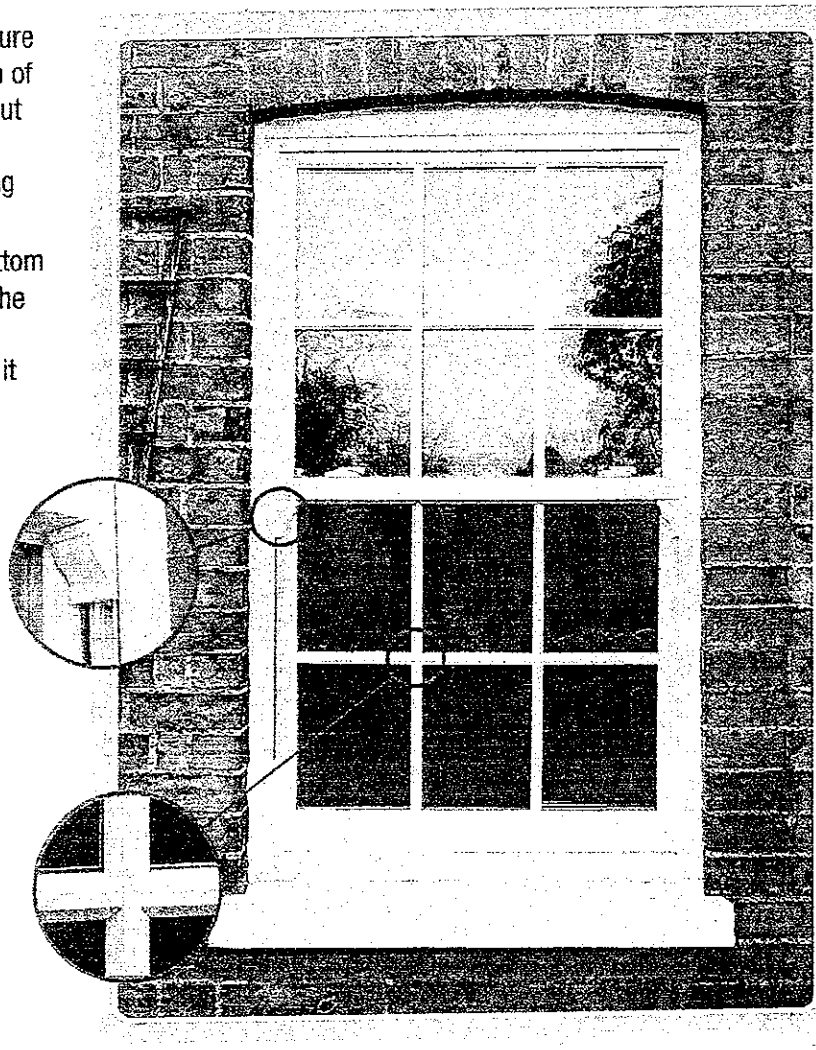
Heritage Vertical Sliders

Technology with traditional styling maintaining authentic looks

Choices range of Heritage Vertical Sliders capture the authentic appearance and familiar function of the traditional timber vertical sliding window but with a whole host of modern features. High performance, security, ease of use and cleaning plus energy efficiency.

Authentic detailing to the sash horns, deep bottom rail, slim interlock and traditional chamfer on the sashes. In the traditional property, it is almost indistinguishable from a timber alternative yet it offers all the inherent advantages of modern materials.



Standard Specification:

- Virtually maintenance free
- 28mm Low E sealed units, complies with Part L
- 4mm Float Glass
- Internally sculptured beads
- Deep 'authentic' bottom rail
- Pre-tensioned maintenance free balances
- Sashes tilt inwards for cleaning
- White key locking cam locks
- White lift handles
- Single cam lock on windows up to 800mm wide
- Double cam locks on windows 801 or over
- Lowline Glazing
- Silver Grey Gasket
- Safe and secure
- Slim 42mm Sash to top Sash
- 54mm Midrail sight lines
- Equal Glass Height
- Front to back 137mm

Old and New with similar sightlines

One of these two windows is double glazed, draft proof, slides smoothly and never needs painting. the other one is single glazed, draughty, rattles, sticks and does need painting. Hugh differences - but look very similar

Spot the similarities
