17th January 2025

Dear Stephen,

Application number PP-13704013 *in relation to* **AWDM/0207/22**

RE: Skywaves House, Ivy Arch Rd - Condition 17 Clearance

I am writing to you to outline the approach we have taken to clear the below condition.

14.	*External Air Moving Equipment* *No external fixed plant, or mechanical vent or duct shall be installed until a scheme has first been submitted to and approved in writing by the Local Planning Authority including details of acoustic performance and any required measures to minimise vibration. All plant shall be maintained in accordance with manufacturer's guidance to ensure the levels contained in the aforementioned acoustic performance are not exceeded and any future plant shall also meet the specified levels within the approved scheme.*

We had a background noise survey conducted by Hepworth Acoustics on the site on September 11th to form the basis of a noise assessment, details of which are appended within the noise assessment document provided.

The result of which was two options: acoustic mitigation measures be provided to windows on the East elevation (see 3.17 & page 12 of the report) or an acoustic enclosure surrounding the heat pump unit itself.

We have opted to provide acoustic measures to windows.

Yours Sincerely,

[redacted]
