Tree Report

Location of Trees: Land South of 14 Ambrose Place, Worthing, BN11 1PZ.

Tree Species: T1/T2- Limes

Areas of concern: These two Lime trees are in good health; I predict them to be 30-40 years of age. they are heavily encroaching on the car park of Southfield house (land to the south).

Solution: I recommend pruning them back in line with the boundary wall.

Copy and paste the section in red into the description of works box on the planning form.

T1/T2 - Limes, Encroaching on the car park of south field house, making a mess of cars, reduce the south side back in line with the boundary wall. current southern spread 4M, post work southern spread 1.5M height and all other extremities will remain untouched.

Kind regards, Luke Bentley.
