Hi Matthew,

Please find attached the revised block plan as requested, and yes you are correct in assuming that the second skip does not occupy a parking space.

I can confirm that the entire dust extraction system is under a maintenance contract with the supplier to ensure that both the operational and acoustic performance of the system is maintained.

Is there any formal documentation I should expect with regards to our compliance with the planning conditions or should I file your e-mail as the formal acceptance? I only ask as I need to complete my internal file on the project.

Kind regards,

Tim Hill
