Permeable Paving

Driveline Priora®

COLOUR – Charcoal

Driveline Priora® is the affordable, low maintenance permeable driveway solution, available in a range of popular colour options to enhance every home.

Priora® offers superior driveway strength for a long-lasting sustainable urban drainage system. Designed to manage driveway drainage by allowing surface water to pass through the joints directly into the ground below, reducing the risk of flooding and not overloading drains. Choosing this product for your driveway project means you won't need any additional planning permission or drainage.

MANUFACTURER'S SPEC: see also PDF manfacturer's spec sheet submitted

Priora is Marshalls' original Concrete Block Permeable Paving (CBPP) system and the best-selling system of its type in the UK. Combining the ever-popular aesthetics of Keyblok block paving with a source-control SuDS solution, Priora paving not only looks great but also mitigates flood risk, removes surface water, and improves water quality without the need for additional linear drainage systems.

Manufactured in Mainland Britain, the Priora system from Marshalls has been proven for over 15 years of successfully installed projects. The innovative nib on the edge of the Priora blocks creates voids for the water to fall into a specially prepared sub-base. The block design also provides 40% more interlock than standard block paving, helping to enhance surface stability.

A variety of laying patterns can be achieved using the 200x100 blocks, and as long as the sub-base is installed to Marshalls' specifications, Priora is suitable for all loading requirements.

Appearance
Solid unit with integral spacers intended to create 6mm drainage apertures
Manufacturing Process
Semi dry pressed & vibrated concrete
Base Raw Material
Concrete
Governing Manufacturing Standards
All data where relevant to be established in accordance with BS EN 1338 : 2003
