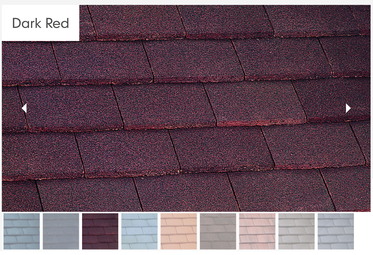
A fantastic range of 9 colours and finishes means no matter what the desired outcome, our concrete plain tiles can provide a solution.

Dark Red



Experiencing the vast variety of textures and colours that our roof tiles provide up close, can guide you in the decision making process when selecting roof coverings. Our efficient sample service can help you in this process.

Request sample

All of our concrete interlocking tiles can achieve an 'A+' rating (which has the lowest environmental impact) in the Building Research Establishment's Green Guide to Specification.

Accreditation to the BES 6001 framework standard for responsible sourcing means that roofing projects using our concrete interlocking slates can now achieve extra credits under BREEAM and the Home Quality Mark (HQM).

To ensure that your roof is compliant with the new standard, our fixing specification service is available.

View product datasheet

The authentic, traditional design of the Marley plain tile gives it a clean, classic look, rivalled only by its outstanding versatility. The plain tile is especially suitable for details such as dormers, eyebrows and conical roofs, as well as vertical cladding.
