Condition 03 – Schedule of materials

Roof covering

The existing roof covering is a mix of corrugated fibre cement and corrugated iron as highlighted in the desigm and access statement.

Image 1 – existing roof covering.

It is proposed to replace the roof covering with a modern equivalent of the above including a layer of insulation. It is proposed to use Kingspan Quadcore KS1000RW in anthracite RAL7016. Product sheet attached below.

https://www.kingspan.com/content/dam/kingspan/kip-west/roof-panels/quadcore-ks1000rw-roof-panel/kingspan-quadcore-ks1000rw-roof-panel-data-sheet-en-gb-ie.pdf

Image 2 – Kingspan roof panel

It is proposed to adorn the roof with a matching gutter system equal to Rainguard 125x100 aluminium box section in Antracite RAL 7016 mounted to white UPVC fascias and soffits.

External walls

The existing building has a mix of materials but is vastly clad in timber weatherboarding stained in slightly different colours.

Image 3 – existing external wall materials

It is proposed to use douglas fir feather edge cladding ex 30mm x 225mm (190mm covering) by W L West & Sons in a natural finish.
