As from:
Diana Wiggs 58b Underdown Road, Southwick BN42 4HL

REFERENCE ABOVE PLANNING APPLICATION:
'Hydrene' 45a Underdown Toad, Southwick

Underdown Road is currently used vastly in excess of its capacity- by heavy lorries/containers and more cars than can safely be driven/ parked along it.

This proposed development takes no account of the blind, narrow entrance between 2 residential houses, which is also too narrow for vehicles to pass, meaning that one or more will have to block Underdown Road (quite narrow and. 'dead-end) while it waits and the one exiting into Underdown Road may only have to turn left and turn at the 'dead-end' - or possibly drive into my garden opposite to turn if it needs to go right!
Neither, and most importantly, does it consider younger children running free, children, either on their way to school,walking/riding scooters/bicycles, chatting and unaware of the increased traffic that will suddenly 'come at them.' As it stands, the proposed entrance/exit is a recipe for disaster. It is my sincere hope that due consideration is given to this before, rather than after, serious injury or worse.
Diana Wiggs
