Title: Details of Photovoltaic Panels for the Development 'Former Eastbrook Primary Academy'.

Date Prepared: 23rd October 2024

Decription: Technical details of PV Panels to support discharge of planning condition.

Version: v1

Details

1. Type of PV Panel: UPOWA Inline Solar

2. Description: UPOWA Inline Solar delivers the ultimate combination of quality, power output and safety to future-proof sustainable homes with a renewable energy source. Safety performance and durability are key. That's why the UPOWA Inline Solar system has undergone rigorous testing to ensure it complies with all British Standards for wind resistance, fire safety and weather tightness. By delivering a 410W power output per m2, UPOWA Inline Solar enhances solar specification to enable housing developers to achieve Part L and Future Homes Standard carbon reduction targets at the most cost-effective price.

3. Type of Installation: Roof Integrated
