Application for Tree Works – Trees Subject to Tree Preservation Order (TPO)

I am writing to seek permission to carry out necessary tree works on two Silver Birch trees that are currently protected under a Tree Preservation Order (TPO).

Tree 1 – Silver Birch (Good Health)

This tree is in good health but has received no previous maintenance. We propose to carry out formative pruning to reduce the overall height and lateral spread by approximately 2.5 metres. This work is intended to manage the size of the tree in a controlled manner and to maintain its long-term health and structure.

Tree 2 – Silver Birch (Poor Health)

This tree is in a state of decline. In recent years, significant decay has developed, and during recent high winds, two large limbs have split and failed. A visual assessment suggests that if all defective and decayed limbs were removed, the tree would become severely unbalanced and aesthetically compromised.

Given its poor condition and structural concerns, we propose to remove this tree in full. We also propose to replant a new Silver Birch in the same location to preserve the continuity of the local landscape.

We trust this proposal demonstrates our intention to manage the trees responsibly and in line with conservation objectives. We look forward to your response and are happy to provide further details or a site visit upon request.
