Business Support

Dear Sir/Madam,

I wish to object to the above development at 26 Canterbury Road with main objection being the impact of loss of light to our property.

For more than one hundred and thirty years of which for forty five years the property has been in my family, for six months of the year, DIRECT SUNLIGHT falls into the north facing end of our property. This direct sun is incredible and happens when the sun is high enough to reach over our neighbours roof.

Should this original slanted roof be changed to a box profile, as in the proposed plans, we would never again benefit from direct sunlight and indeed the light levels would be greatly reduced in half our property sitting in our middle room, we currently enjoy natural light and can see the sky, and with the proposed extension, we would only be able to see building, cutting out our light

no of the proposed windows are not
scured glass causing loss of privacy
th in the home and in our garden
overlooking our kitchen, middle room
hd garden.

part from the noise and disruption of
e proposed construction, with lack of
rking to facilitate, scaffolding used
previous owners damaged the side lining
ss at our house, and impacted our access
ed we would physically need fully
nobscured access to our property side.

e council no longer allows front gardens
be converted for parking so should the
oposed development go ahead, there is
ready insufficient parking outside the
oposed development, so increasing the
pacity for further occupants will
mpound the parking issues and traffic
i an already busy bus route.
ot only will the light be obliterated inside
r property, but our seating and washing
ying area outside would be in shade
tirely for the majority of the day compared to now.

Yours faithfully
